EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Albert S. Penilla on 11/10/05.

The application has been amended as follows:

Claim 1:

In a computer system, a method of presenting information associated with a hierarchy comprising the steps of:

- creating a first display area, said first display area displaying a first node of said hierarchy, the hierarchy being of a file system;

- creating a second display area, said second display area presenting a plurality of child nodes of said first node;

- performing the following when one of said plurality of child nodes in said second display area is selected:

- updating said first display area to include said one of said plurality of child nodes; and

- updating said second display area to display a plurality of nodes in place of said plurality of child nodes, said plurality of nodes being the child

nodes of said selected child node, and wherein said step of updating said second display area further includes the steps of:

determining whether said child node is a leaf node of said hierarchy; and

removing said second display area, if said child node is a leaf node.

wherein the step of performing further includes resizing said first display area to eliminate any unused display space and allowing the second display area to expand into the space not used by the first display space.

Claim 12:

In a computer system, a method of presenting information associated with a hierarchy comprising the steps of:

creating a first display area, said first display area displaying a first node of said hierarchy, the hierarchy being of a file system;

creating a second display area, said second display area presenting a plurality of child nodes of said first node;

performing the following when one of said plurality of child nodes in said second display area is selected:

updating said first display area to include said one of said plurality of child nodes; and

updating said second display area to display a plurality of nodes in place of said plurality of child nodes, said plurality of nodes being the child nodes of said selected child node;

wherein said step of performing further comprises the steps of:

determining whether there is unused display space in said first display area;

performing the following when there is unused display space in said first display area;

resizing said first display area to eliminate said unused display space; and
expanding said second display area to include said unused display space.
